Chinese Markets for Polypropylene

Published on October 2007

Report Summary

China has experienced over two decades of high economic growth, which has been stimulated by the consecutive increases of industrial output, consumer consumption and capital investment. China's GDP has been growing at 11% per annum. National industry output has been advancing at 10.3% annually and will continue to sustain a strong growth into the next decade. The fast-growing middle class is creating an enormous consumer society. As the fastest-growing economy in the world, the emerging market has attracted the attention of investors and corporations around the world for the last two decades.

To deepen the reform of state-owned enterprises is a long-term task and needs great efforts. The reform of state-owned economy has witnessed rapid changes in both economic and social aspects. The introduction of foreign advanced technology and capitals will continue to be favored by the Chinese government and business community. New ways will be adopted to utilize foreign investment, including mergers, acquisition, and investment funds and securities investment. China will continue to improve its investment environment in the areas of legal system, intellectual property protection, foreign trade and investment regulation, infrastructure and financial system. China is the second largest foreign investment recipient after the United States in the world today. Given its vast market, the country provides tremendous opportunities for investment and trade both for the present and future.
